DONT BUY THIS PACK IF YOU ARE AFTER THE POWERS. This game has so many issues that make it unenjoyable. Though I was a child of the 90s, thanks to a few local arcades that lovingly struggled to continue to exist during my childhood, I'm intimately familiar with the experience of playing the types of 80s arcade games this was meant to reproduce. It fails in soooooo many ways. FFXMaster pretty much sums it all up in their scathing review. I bought the game at a very low cost but don't enjoy it at all. I probably won't be playing it again unless the developer takes some of the criticism in that review to heart and makes adjustments.. Absolutely awful... After a recent update it started lagging like hell... I cannot get a refund now... I do not recommend you pay 10 dollars for this game go buy something else that you might enjoy. I felt in love with this game from the first sight.

It so much reminds me the days when I used to play Zuma back in 2005. The art design of this one is very pretty, the gameplay is smooth and the soundtrack is so beautiful it hurts. I am so glad I got this. Big thanks for the developer. <3. A great step forward in VR storytelling! Highly Recommended.

In this 38 minute **non interactive** story every element comes together to form a very immersive and engaging experience.

Starting with a strong foundation, a simple and straightforward base from Phillip K. ♥♥♥♥♥♥ the same author of the book that was adapted into the Blade Runner classical movie. Then the great voice acting combined with the beautiful characters animations give you believable performances. The soundtrack was also very impressive. I'm a lover of movies and games soundtrack and this one really stands out with nods to the Blade Runner synths. I was pleasantly surprised when the Junkie XL name appeared in the credits, he is the author of the Mad Max Fury Road soundtrack. Tying up all the elements there is a great sense of direction, there's an innovative use of scale as a storytelling device. Also if you can I recommend to view it in

Cinematic mode, with camera motions.

Could have watched a full-feature animation.

good game old but fun at times. This game is great fun. There is a learning curve, but you will likely get the hang of it after a few hours. They've updated the game with a tutorial, too. There are many great players to play with and against. Once in a while you may also come across a special breed of players who are attracted to soccer games but don't know how to pass, don't know the offside rule and want to take the ball from friend or foe whatever it takes.. Not bad, but not great.. A great experience that breaks boundaries and norms like someone turned on no-clip.. very stupid little boring game.. I like it. Its fun, good little time killer.. Good:

challenging
music
gameplay
gets you into overgrowth
cheap
ninja rabbits

Bad:
graphics
story

its fun to play by yourself and with friends. Wolfire is one of my favorite studios because theyre inovative and think out side the box. This is a hidden gem and everyone should add it to their library.. I love this game! I bought it at day 1 and I'm proud of this!

It's very hard, and challenging and when I play with my boyfriend we yell out each other, but we still love it because this game is also very fun. The art, the atmosphere, the music and the gamplay, it's all perfect \u2665

I can't wait to finish the game and finally escape the labyrinth!

. Eliosi's Hunt has solid graphics, but the hybrid style of platforming and top-down shooting doesn't really work here. Anything involving jumping and dashing is agonizing; some might call it 'difficult' but it is not difficult in a fun way. The shooting is okay in a basic sort of way, but the main challenge there is fighting sudden swarms of enemies which are also not particularly fun or interesting.

I'm disappointed that I paid as much as \$1.99 for this on sale. Buying it at full price is out of the question.. At first I thought, "Huh, this feels just like asteroids!" when I got to the helm. But it's so much more than that.

Omni Link is more of an RPG V VN hybrid with action in a vein similar to Asteroids for the space combat. You can explore and travel the star systems, but interactions are mostly combative or story driven. It's fun but the story is where it is really at.

I greatly enjoyed the story. Good times between Keb, Arcadia, and Dawn. Malthus livens things up quite a bit. Suzumi's rescue was especially good for the soul. All in all, I probably enjoyed the story more than I would have going to see a movie for the same price tag.

Music is freaking great. Honestly my favourite part is the sound track--I wish there was an add-on with the vocal tracks and some concept art.

Art is very well done. I love the intermixing of comicbook/manga style panels here and there, and the CGs that are scattered across the game are wonderful. Some of the moments are especially great such as the hug and the cowlick scene.

Action as previously said reminds me of Asteroids. Augmenting that however is your fleet. As you pilot the main ship, Dawn takes care of your support ships and they are quite effective. Meanwhile you can morph into whichever one you like for direct control agains the enemy: allowing you to be the quick scout, the gunboat, etc and delegate the other roles to the A.I. backing you up.

Towards the more typical VN parts things are a bit more sparse. Saving only can happen outside of the VN portions. No gallery, screenshots don't seem to work, etc. But it gets the job done. More focused on the space combat parts of the UI than providing an interface like renpy. No real complaints because the story is excellent.
